Responsive to the Office Action dated September 25, 2003,
Applicant would like to make the following

REMARKS

Drive member 92 is an elongated, vertically extending
structure which has an internal threaded bore 94. The top portion
90 of this drive member 92 is located in a distribution leg 88.
Finally the drive member is supported by three bearings 102. The
sheet of drawings with figures 5, 6, and 7 have been revised to
correctly show the three bearings 102 and it is believed that the
Examiner's objection has been overcome thereby.
